ABOUT ME

Full stack developer with 5+ years of experience building fast, accessible web applications. I enjoy turning messy product problems into simple interfaces, and I care about clean code, good tests and teams that ship.

EXPERIENCE

Lead Software Engineer

Jan 2022 – Present

AI Tech Solutions · Remote

- Led a team of 5 engineers building a microservice platform with React and Node.js
- Cut average API latency by 40% by redesigning slow MongoDB queries and adding caching
- Mentored junior engineers through code reviews and weekly pairing sessions

Frontend Developer

Jun 2019 – Dec 2021

Brightlane Studio · San Francisco, CA

- Built a design system of 40+ components used across 6 product teams
- Improved Lighthouse performance scores from 58 to 94 on the marketing site

EDUCATION

B.S. Computer Science

2015 – 2019

State University

PROJECTS

OpenBoard github.com/janedoe/openboard

- Real-time collaborative whiteboard built with WebSockets and Canvas. 1.2k GitHub stars.
